

I LIKE WATCHING MY MONEY EVAPORATE INTO THIN AIR.

OR WHY SAVING 15 - 40% ON MATERIAL COSTS BY USING
THE REVOLUTIONARY DUX SPRAY GUN DOESN'T INTEREST ME.

There is a commonly held belief in our industry that says, "don't fix it, if it ain't broke." But what if you don't know it's "broke"?

Fact of the matter is, spray gun technology hasn't changed much in over 20 years. So when we set out to design a new spray gun, we wanted to design one that was more efficient. More environmentally friendly. Yet, still able to consistently deliver a high quality finish.

What we ended up with is a spray gun that's revolutionizing the industry. One that market leading companies such as Stickley Furniture and

General Dynamics Electric Boat are using for a variety of applications.

What gives DUX spray guns the ability to cut your material costs by 15 - 40% is our patented DUX Advanced Laminar Airflow Technology, developed by studying high-performance Formula racecar engine airflow.

To find out more about DUX spray guns or hear from actual customers how our guns paid for themselves after just a few jobs, visit our Web site or give us a call. You'll also find a handy ROI calculator to see how much money DUX spray guns will save you.

Just go to www.duxarea.com or call us at 888•DUX•AREA.

DUX 

RIGHT NOW YOUR OLD SPRAY GUN IS HIDING IN SOME CORNER, SHAKING WITH FEAR.

Can you blame them? One look at our revolutionary DUX Automatic spray gun, and it's easy to see why it's your old spray gun's worst nightmare.

Because of the highly efficient way DUX spray guns work, it makes them ideal for the wood finishing industry. They can handle any type of coating including waterbornes. And create a softer, more uniform spray, resulting in an exceptionally high finish quality.

All our spray guns use very low operating pressures. So whether you're using the DUX Pressure Feed, Gravity Feed or our Automatic gun for robotics and reciprocators, overspray and paint booth fog are drastically reduced, which can save you 15 - 40% on material costs.

It is our patented DUX Advanced Laminar Airflow Technology that makes all our guns so unique. Developed by studying high-performance Formula racecar engine airflow, it has literally revolutionized the spray gun industry. In fact, industry leaders such as Stickle Furniture and General Dynamics Electric Boat have switched to DUX for a variety of applications.

To find out more about DUX spray guns or hear from actual customers how our guns paid for themselves after just a few jobs, visit our Web site or give us a call. You'll also find a handy ROI calculator to see how much money DUX spray guns will save you.

OLD, INEFFICIENT TECHNOLOGY?

I'M GOOD WITH THAT.

OR WHY I'M STILL USING 20-YEAR-OLD TECHNOLOGY IN MY
WOODWORKING BUSINESS INSTEAD OF THE REVOLUTIONARY
DUX SPRAY GUN.

With the wood finishing industry evolving away from solvent-based materials, isn't it time your spray gun evolved to something better?

Luckily, we developed a spray gun that is technologically advanced enough to handle any type of coating including waterbornes. The revolutionary new design of the DUX spray guns creates a softer, more uniform spray resulting in an exceptionally high finish quality.

And because it uses very low operating pressures, overspray and paint booth fog are drastically reduced. Which not only saves you 15 - 40% on material costs, but makes DUX spray guns more environmentally friendly.

What makes our spray guns so unique is our patented DUX Advanced Laminar Airflow Technology, developed by studying high-performance Formula racecar engine airflow. It has literally revolutionized the spray gun industry. In fact, market leaders such as Stickle Furniture and General Dynamics Electric Boat have switched to DUX for a variety of applications.
